Ratio has been designing and manufacturing EV charging cables for over a decade; all products are fully tested and approved for the UK and EU markets.

Ratio mobile chargers are the perfect option to safely charge your vehicle on the go with a selection of mains connections. Ranging from a 3 pin plug to a single or three phase commando socket, the Ratio mobile charging family will deliver from 1.4kW to 22kW.

## Charging Accessories

To complement its charging solutions, Ratio also designs and manufactures a range of charging cables and mobile chargers, to connect to a wide range of electrical connections.
